

Dear valued customers,

We hope this letter finds you well. We would like to express our sincere appreciation for your continued patronage and support of Develosil.

We are discontinuing production of Develosil HPLC columns due to declining demand and aging equipment. Sales will stop once the current inventory is depleted. We apologize for any inconvenience and appreciate your understanding.

Our new and upgraded product line, "FlexFire Fusion", will replace Develosil HPLC columns.

Sincerely,
Nomura Chemical Co., Ltd

Note:

Discontinuation Date: 9/30/2023

(Sales will end once inventory is depleted)

Reason for Discontinuation:

Our equipment used to manufacture the Develosil series is no longer optimal. New equipment is necessary. However, it is infeasible to replicate the silica gel substrate used in the Develosil series.

Products Subject to Discontinuation and Successor product:

All Develosil series columns (please refer to the attached document).
